

Weatherization Assistance Software From Roeing Corporation

CREATING SOFTWARE FOR LIHEAP SINCE 1998

Roeing Corporation has worked closely with the state of Indiana to create Weatherization Assistance Software to enable users to more efficiently and accurately report on weatherized homes and buildings. Our software is web-based, which allows your data to be stored in one centralized location and accessed securely and conveniently, with role-based security.

Features

- Client demographics
- Job costs
- Measurers
- Dwelling statistics
- Refrigerator replacement
- DSM installations
- Integrated with EAS for referrals
- Managed multi-agency waiting list
- Multiple funding sources
- Inventory management
- Electronic data transfer
- Budget and financials
- Agency and state level reports
- Labels for mass mailings
- State level monitoring
- Overhead cost budgeting

Our **Weatherization Assistance Software** allows agencies to track all of their applications, job information, costs, and measures for each home that is weatherized. It can also link to our Energy Assistance Software to identify EAP recipients that qualify for Weatherization. Agency and State level reporting allows for simple tracking and monitoring of completion information.

For more information and a demonstration of how software can work for you, contact Brad Forgey, Special Projects Manager at bforgey@roeing.com
